

Henry Clay High School Athletic Facility Improvements

project description | athletics

location

Lexington, Kentucky

client

Dunbar & Associates
Architects, P.S.C.

owner

Fayette County
Public Schools

budget

\$3,400,000

This athletic facility improvement project is the third of several for the Fayette County Public School system. The attempt is to provide safe, state of the art facilities while maximizing the facilities potential lifespan. The improvements require a complete stadium replacement consisting of a: multi-use artificial turf athletic field, a 400 meter broken-back track, newly designed architectural stadium seating, restrooms/concessions building and a parking lot. This new layout required the implementation of ADA accessible routes from the school/parking lot to the athletic facility. The size of the site created a challenge in providing a desired facility that is consistent with the standards set forth in the design of the previously designed and built facilities. The overall design accommodates many users, allowing for better circulation while functioning as one unique facility.

project components

- Design ADA accessible sidewalks and widen sidewalks
- Development of better circulation patterns
- Provide construction documents and specifications
- Provide state-of-the-art track and field facilities with related amenities
- Develop on site water detention capabilities
- Provide landscape design
- Provide contract administration
- Provide new stadium lighting
